

Sprint Review 31.3

Author – Borna Jamali

Team shows demo for this sprints completed features

Backlog item gets prioritized for the next sprint goal.

Next sprint goal, discussion:

Finish the goal assigned for this sprint.

Cloudification is important, device should run in cloud (highest priority)

- Huggingface
- Streamlit cloud
- S3 used for data storage but data should be fetched from cloud.

2 devices 2 models, basic concept of seamless lifecycle. (important)

- Breaching device is needed.

Hiroshi asks if we should switch to 1 week sprint

- Decided to stay on 2 week sprints.

Team works on Retrospective:

Good:

- Team got a lot of tasks that took a long time done.
- CI works well with RobotFrameWork

Bad:

- Arduino Docker problems
- Learning to use the microcontrollers took a lot of effort

Inspect & Adapt Scrum Process:

- Good: Working together in sprint.
- Bad: Working more on the demo part,
- How to better: Change luola day? So we can prepare more for sprint review and demo

Team selects

New SM : Tuula

New Secretary: Arttu
